Subject: [External] Docket # 2020-229-E

To Whom it may concern,

Dominion energy has petitioned for tariffs on solar power in South Carolina. I vehemently oppose any such tariff as the increase in cost of service could greatly hinder the expansion of clean energy in our state. As we suffer from the effects of climate change as a coastal city in Charleston the proposal to enrich Dominion at the cost of clean energy, and further limit consumer choice or generation in this state is unacceptable. I would ask you to reject Dominion's self serving and dangerous tariff.

If you have any questions or concerns regarding my request the PSC Reject this proposal please do not hesitate to contact me

Sincerely,

Thomas F. Drazan

Charleston, SC
